

Psychology

• Fear of Blame

Generic root cause

Poor learning

Repeated issues

More firefighting

long meetings

less planning

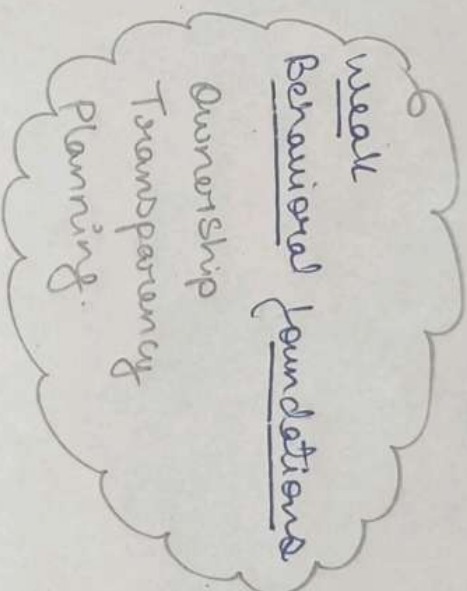

more delays

CEO lacks visibility

System Visibility To Execution

~ using information alone doesn't create action?

The company doesn't have

a data problem

It has a behaviour problem

Tools exist ✓

Ownership, Transparency

& Planning are

INCONSISTENT.

Information,

But....

Behaviour determines actions

Business impact

Repeated Issues

long meetings

missed commitments

Delayed Projects

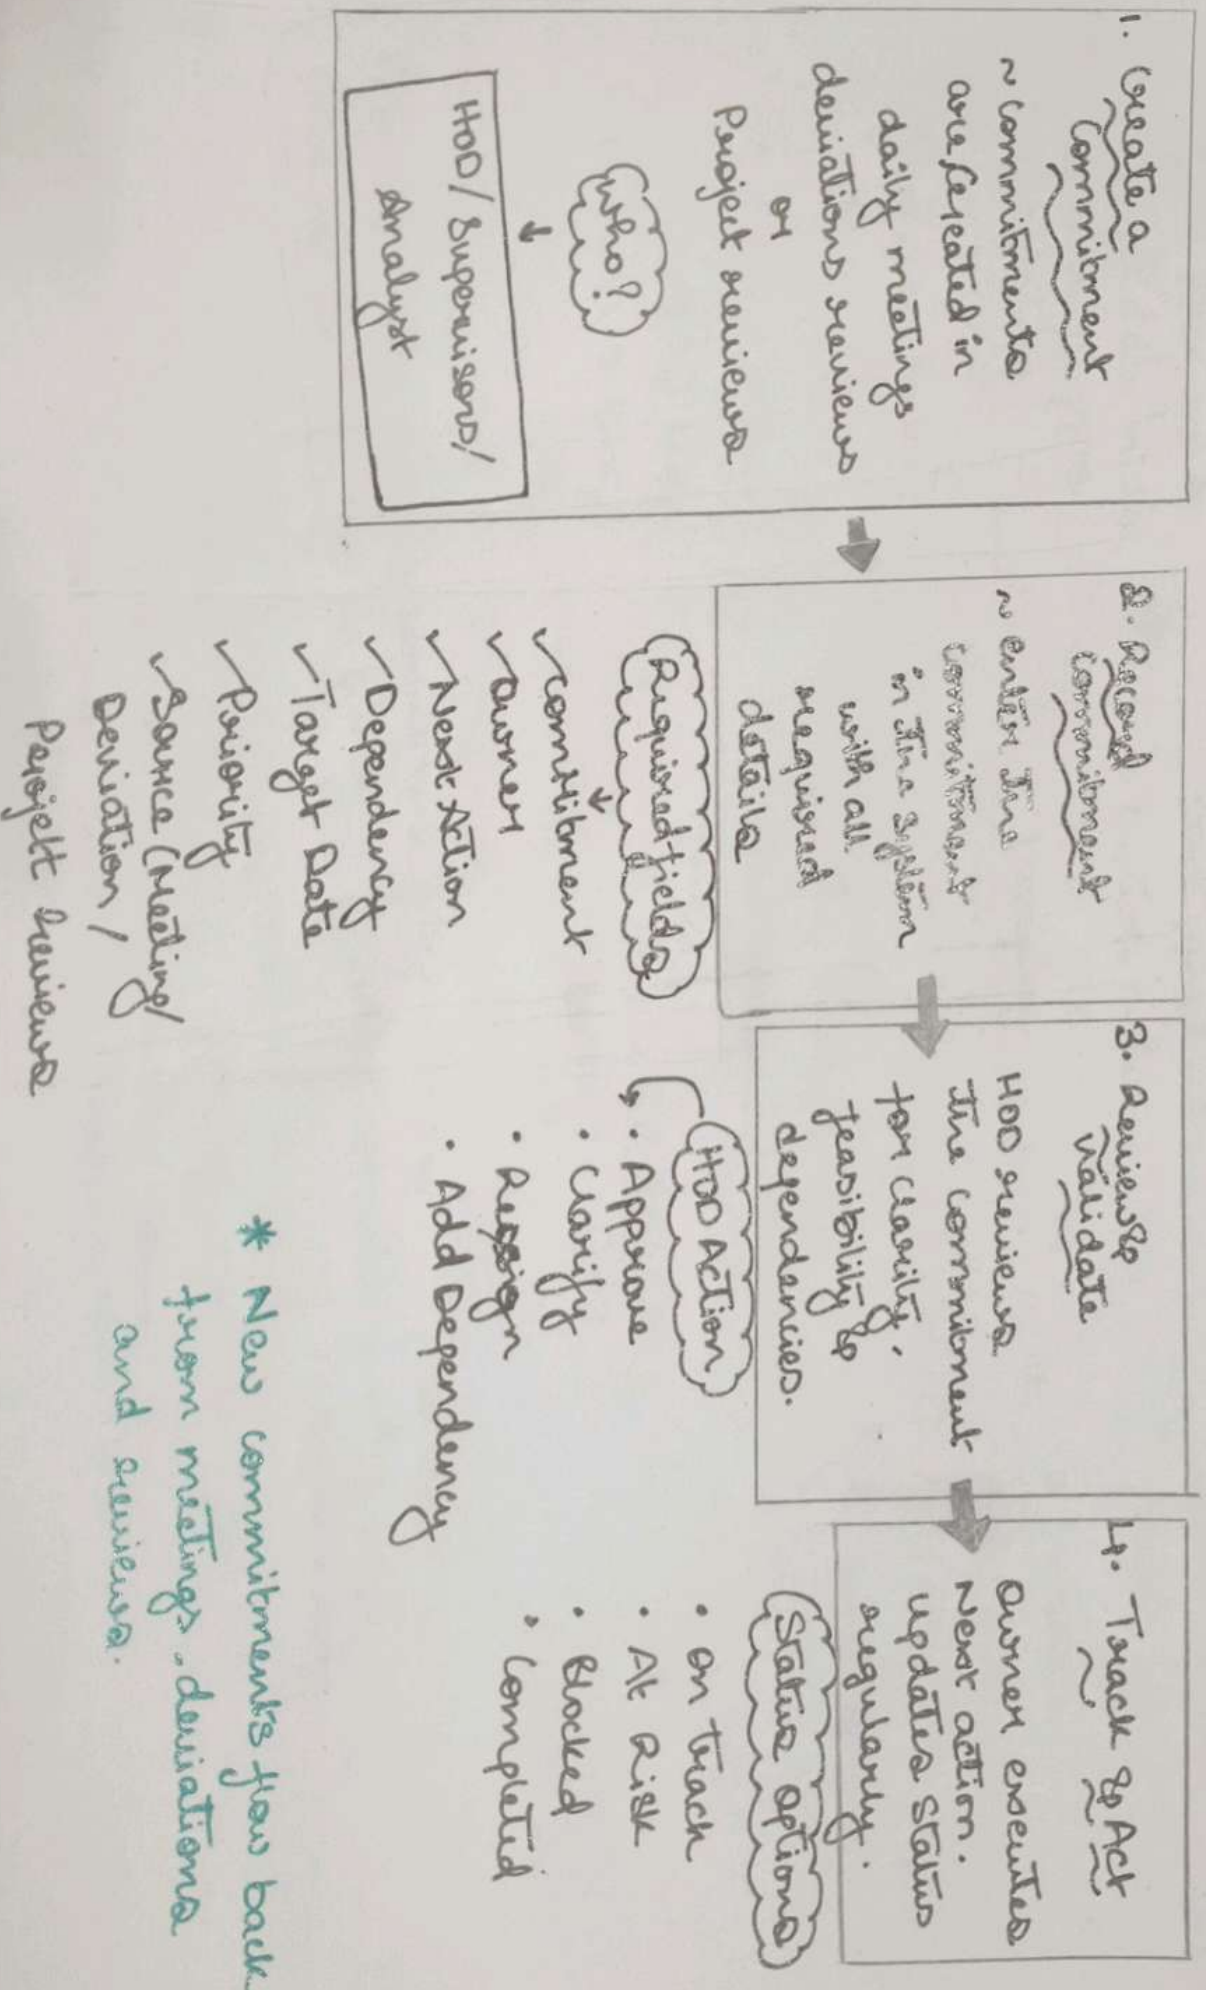

CEO lacks visibility

Scaling Risk

(2 Projects → 8 Projects)

Commitment - to - closure system - Workflow:

Goal: Convert conversations & issues into owned commitments & Drive them to closure through visibility - accountability & learning.

5. Escalated if Stalled
 If no progress or target date missed, system triggers escalation.

Escalation Rules Example

- At Risk > 2 days
- Blocked > 3 days
- Overdue > 1 day

6. Close to learn
 Once completed capture notes and the learning

Capture

- What's the outcome?
- What prevented delay?
- What will we do differently?

Commitment Status legend

- On track
- At Risk
- Blocked / Overdue
- Completed

Principles that drive workflow

every commitment has an owner.

Dependencies are visible, not hidden.

We track what things aren't moving

Escalation is system-driven not person-driven

Learning is captured so the same problems don't repeat.

Weekly / Monthly Review

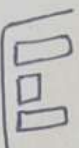

- Review commitments by status
- Review commitment repeatedly failing
- Review by failure reason.
- Discuss systematic blockers
- Take actions to remove bottlenecks.

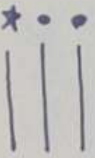

Tools & Automation:

- Excel / Google sheets - data capture * capture
- Power Automate - reminders and escalations
- Email / WhatsApp - Notifications to owners
- Claude / GPT Codex - Trend analysis, recurring pattern detection
Summary for leadership.
